Japanese: Beginner

Projects

Grievance Module | *React*

June 2023

- This module is for the company union to record and monitor grievances.
- The module is divided into three applications: Report, Management, and Settlement, providing users with more flexibility to address and advance a particular grievance.
- This module helped my client monitor and track applications, ultimately contributing to an 80% improvement in productivity time.

Audit Module | *Flutter*

May 2023

- The app offers real-time tracking and monitoring of ongoing audits, allowing audit administrators and team members to collaborate seamlessly.
- Users can easily create and configure different types of audits, specifying the parameters, checklists, and compliance standards relevant to their industry or organization.
- Users can conduct audits in offline mode, ensuring functionality even in areas with limited or no internet connectivity. Data synchronization occurs when a connection is restored.

Incident Module | *React*

November 2021

- Led the implementation of the incident module, enabling the organization to track and manage workplace incidents, accidents, and near-misses
- Collaborated with cross-functional teams to develop incident reporting procedures and safety protocols.
- Conducted incident analysis to identify root causes and recommend preventive measures, contributing to a safer work environment.

SenflexT Health Portal | *Angular[Typescript], NodeJs*

May 2021

- Developed an Information Retrieval System (IR) with Angular for the front end and Node.js for the back end.
- Designed an intuitive user interface for efficient information search and retrieval.
- Implemented search algorithms and integrated external data sources for comprehensive information access.
- Improved search speed by 25% and enhanced accuracy through algorithm optimizations.
- Received positive feedback from users for the user-friendly interface and improved search capabilities.

Leadership / Extracurricular

Sodales Solutions

May 2022 – Feb 2023

Module Lead

- Received the 'Best Team Player' award for my leadership and helpfulness toward my coworkers.
- Received commendations from clients for exceeding expectations in terms of project quality and meeting all project milestones.
- Mentored and coached junior team members, resulting in a 30% increase in their productivity and skill development.
- Successfully resolved complex technical challenges related to "SAP Fiori launchpad session out", leading to a 25% reduction in project delays.
- Implemented agile methodologies and streamlined project workflows, leading to a 20% improvement in project efficiency.
